

X1

OASIS CAR WASH SYSTEMS

OUR STORY

At Oasis Car Wash Systems, we manufacture dependable, high-speed, efficient car wash equipment with the investor in mind. Our products are made to be the best on the market. We don't take shortcuts because there's no substitute for high quality.

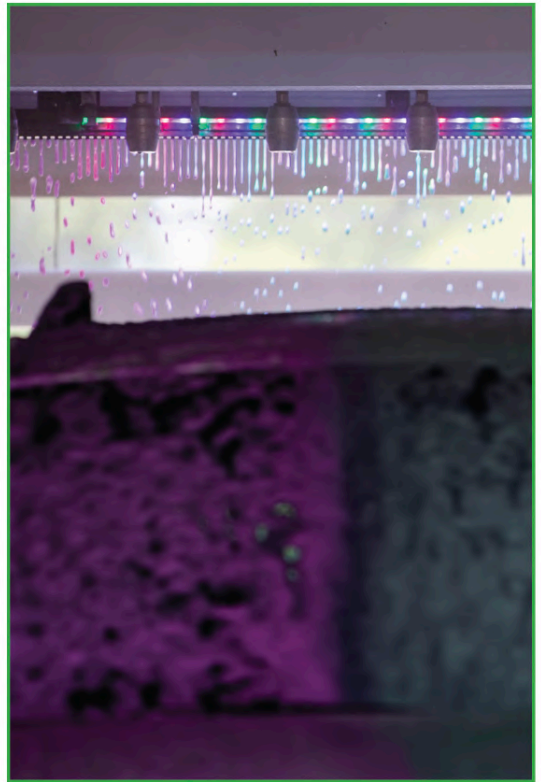

PRACTICALITY

The Oasis X1 offers one of the most economical touchfree in-bay automatics in the industry. By simplifying washing architecture to one spraying mechanism, investors save start-up funds without sacrificing the same great car wash experience Oasis is known for.

INTELLIGENCE

Our onboard XPert monitors the entire system as well as the customer's vehicle and keeps you informed of unusual events. XPert is not only your consultant in troubleshooting but in some cases acts as a service worker as well. X1 features Vehicle Avoidance System (V.A.S.) If X1 comes in contact with any portion of the vehicle such as extended mirrors, trailer hitches, snowplows or any other after market add on, V.A.S. will make necessary length and width adjustments and continue the wash cycle.

VERSATILITY

The Oasis X1 smart technology carefully determines the length and width of each vehicle. This feature allows you, the operator, the versatility to wash anything from the smallest cars to the longest double-cab pickups, even dually trucks. Its great functionality also permits the selection of wash cycles just right for each location. Different geographical locations have different needs to produce clean cars, and every Oasis product offers that flexibility.

CLEANING

Oasis developed the X1 to offer a lower cost alternative. Its highly efficient chemical delivery system, along with maximum water impingement, provides optimum wash results. Better cleaning ensures customer loyalty.

RELIABILITY

When investing in equipment, reliability is of utmost importance. Hydraulically powered, the X1 gear drive system is the most reliable in the industry. The simple design of the X1 allows for minimal moving components, which adds to its reliability and longevity. Less downtime equals more profit, year after year.

REMOTELY OPERATE EQUIPMENT

Touchscreen Interface

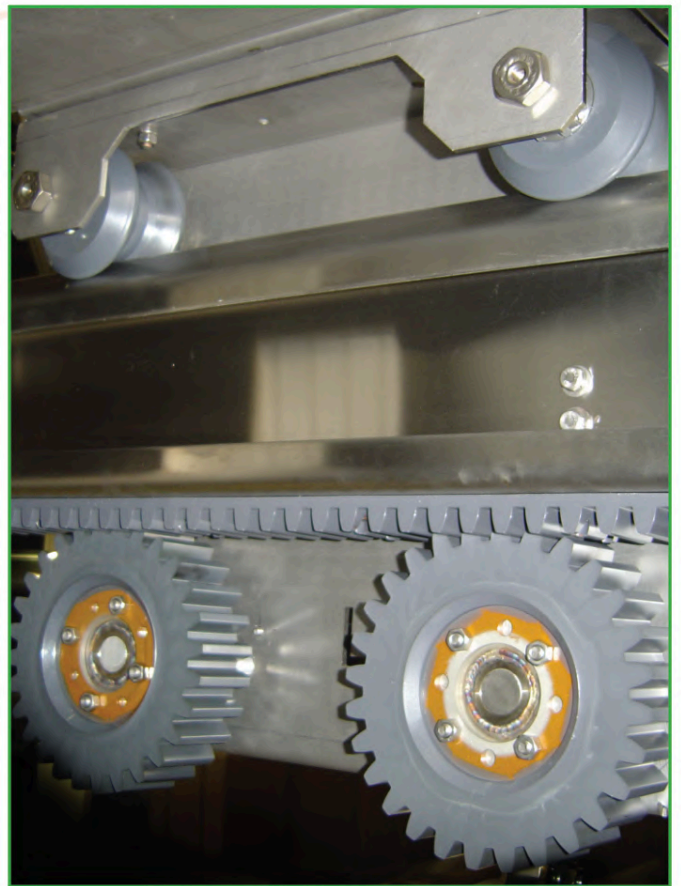

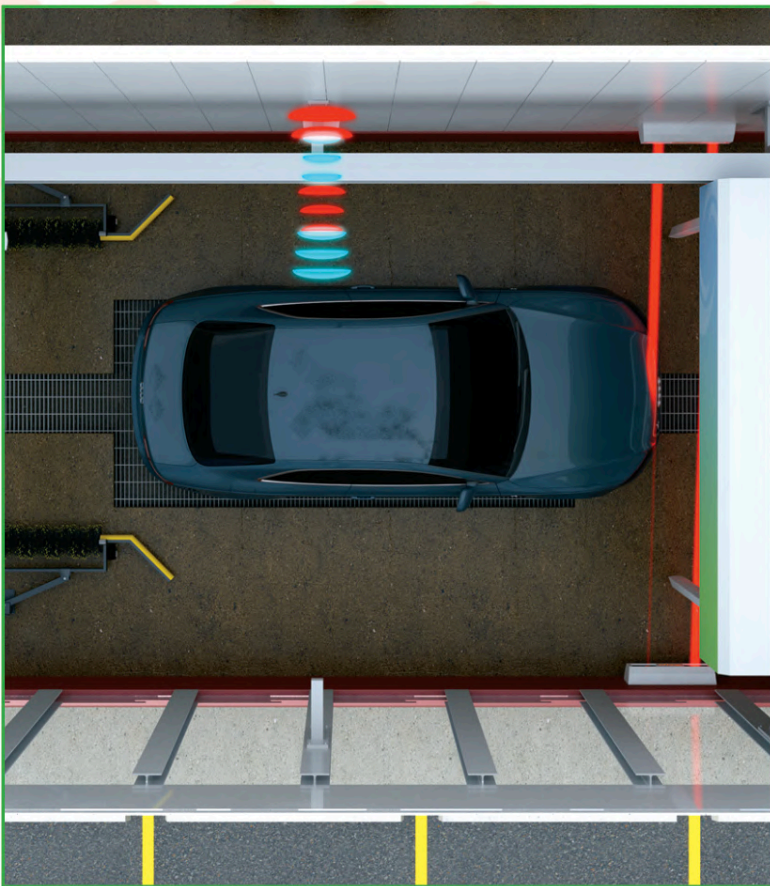

CONSTRUCTION

The X1's customer-friendly open design makes it easier to enter and exit the wash bay, increasing throughput and making it more visually appealing. The wall-mounted frame and elevated carriage system help protect the unit from strike damage as well as chemicals and grime.

ELECTRONIC SCANNING AND POSITIONING

This virtual stop station “reads” the car’s location within the bay while the electronic, or “smart system”, eliminates the need for a positioning device on the floor. This feature makes it easier and faster for customers to drive in and out of the wash bay. Increased throughput means increased profit. It also means satisfied returning customers who have no concerns about lining up the car to hit a floor device.

MyWash **BUY UP**
TECHNOLOGY

Gives you the functionality of a Tunnel Wash Controller by allowing your customers to upgrade the wash package they have selected with any additional wash functions they may like to purchase. The system then places all purchased upgrades in the proper position in the wash cycle. This allows your customers to have complete customization of their wash.

System Dimensions

• Bay Dimensions

	Recommended	Minimum
Height:	12'0" – 3.66m	10'6" – 3.20m
Width:	15'4" – 4.67m	13'7" – 4.14m
Length:	30'0" – 9.14m	29'6" – 9.00m

• Maximum Vehicle Height

Standard X1:	7'0" – 2.1m
Extended Height Option:	7'6" – 2.3m

• Required Utilities

Electrical:	Voltage	* Amps	KVA
	208/230	100	35
	400	48	35
	460	42	35
	575	34	35

50 hertz available. Call factory for details.

* 20 am control circuit required. Not included in above specifications

Water:	Size:	1" – 25.40mm
	Inlet Pressure:	50psi – 3.45 bar

Compressed Air:	CFM:	10
	Pressure:	90psi – 6.2 bar
